To check the version of Mac OS X on your Mac, choose **About This Mac** from the Apple [blue] menu at the upper left of your screen. If the version reported under **Mac OS X** is 10.5.x where `x` is a number, you are running Leopard. In general, Macs purchased since November 2007 come with OSX 10.5 installed.

Pirate is the name of the secure network at Southwestern. In order to connect your Mac to the pirate network, a few configuration steps are required. Once these are completed, you will not need to do them again to connect your Mac to the pirate network. Make sure you are running the latest updates to your Mac operating system. You will need to be running at least version 10.5.4. If you need to update your Mac operating system, choose **Software Update** from the Apple menu and install all the updates listed.

1. Choose **Open Network Preferences…** from the AirPort icon in the menu bar.
2. Make sure **AirPort** is selected in the **Network** window.
3. Click **Turn Airport Off** to the right of the **Status:** area in the **Network** window.
4. Click the **Advanced...** button located at the lower right area of the **Network** window.
5. Click the **802.1X** tab.
6. Click the small gray triangle to the left of **System Profiles**.

![Network window with System Profiles and 802.1X tab highlighted]

7. Select the item under **System Profiles**. The name may be **System Profile** or may have **pirate** in the name.
8. Click the **–** below the **System Profiles** pane. If you receive a prompt to acknowledge the deletion, choose to delete the item.
9. Click the **AirPort** tab.
10. If **pirate** is listed under **Network Name**, select **pirate** and click the – below the **Preferred Networks:** pane.

11. Click the + below the **Preferred Networks:** list.

12. In the **Enter the name of the network** window, enter **pirate** for the **Network Name:**, choose **802.1X WEP** for **Security:**, enter in your SUeID for **User Name:** and your password in the **Password:** field. Verify that **Automatic** is selected for the **802.1X:** setting and that **Remember this network** is checked.
13. Click the Add button.
14. Click on pirate and drag it to the top of the Preferred Networks: list.

15. Click OK in the AirPort Network window.
16. In the Network window, click the Turn AirPort On button.
17. At the **Verify Certificate** window, click **Show Certificate**.

18. Click in the empty box to the left of **Always trust “radius.southwestern.edu”** located below the lock.

19. Click **Continue**.
20. If you receive the **Certificate Trust Settings** window, enter the password you use to log into your Mac.

21. Click **OK**.

22. Wait for a few to several seconds for the **802.1X Authentication** window to appear. Enter your SUeID password.

![802.1X Authentication Window](image)

23. Make sure **Only use this password once** is **not** checked and then click **OK**.
24. In a few to several seconds, the **Status:** area will show **Authenticated.**

![Network settings](image)

25. Click the **Apply** button if it is enabled in the **Network** window.

26. Close the **Network** window.

27. Open up your favorite browser, go to one of your sites, and you should be all set.

Note: When you change your SUeID password, you will be prompted with the **802.1X Authentication** window shown in step 17. Enter in your new password and click **OK.**

---

If after followings these steps you are not able to connect to the pirate wireless network, perform the steps on the next page.
1. Open the **Utilities** folder in your **Applications** folder.

2. Double click **Keychain Access**.

3. Click **All Items**: under the **Category** heading in the left pane.

4. Select **pirate** and choose **Delete** from the **Edit** menu. Choose to acknowledge the deletion.

5. Select **radius.southwestern.edu** and choose **Delete** from the **Edit** menu. Choose to acknowledge the deletion.

6. Select **WPA: pirate** and choose **Delete** from the **Edit** menu. Choose to acknowledge the deletion.

7. Choose **Quit** from the **File** menu.

8. Go to the first page of these instructions and repeat the steps.

If you are not able to connect to the pirate network after completing all of these steps, please contact the Help Desk at x7333 [512-819-7333] or helpdeskX@southwestern.edu
